

FOR KINGTYPE DUAL BAND

Step 1: Open your google chrome app. Type 192.168.1.1 on the URL bar.

Step 2: Log in your ONU using the username: admin and password: admin

ONU WEB System

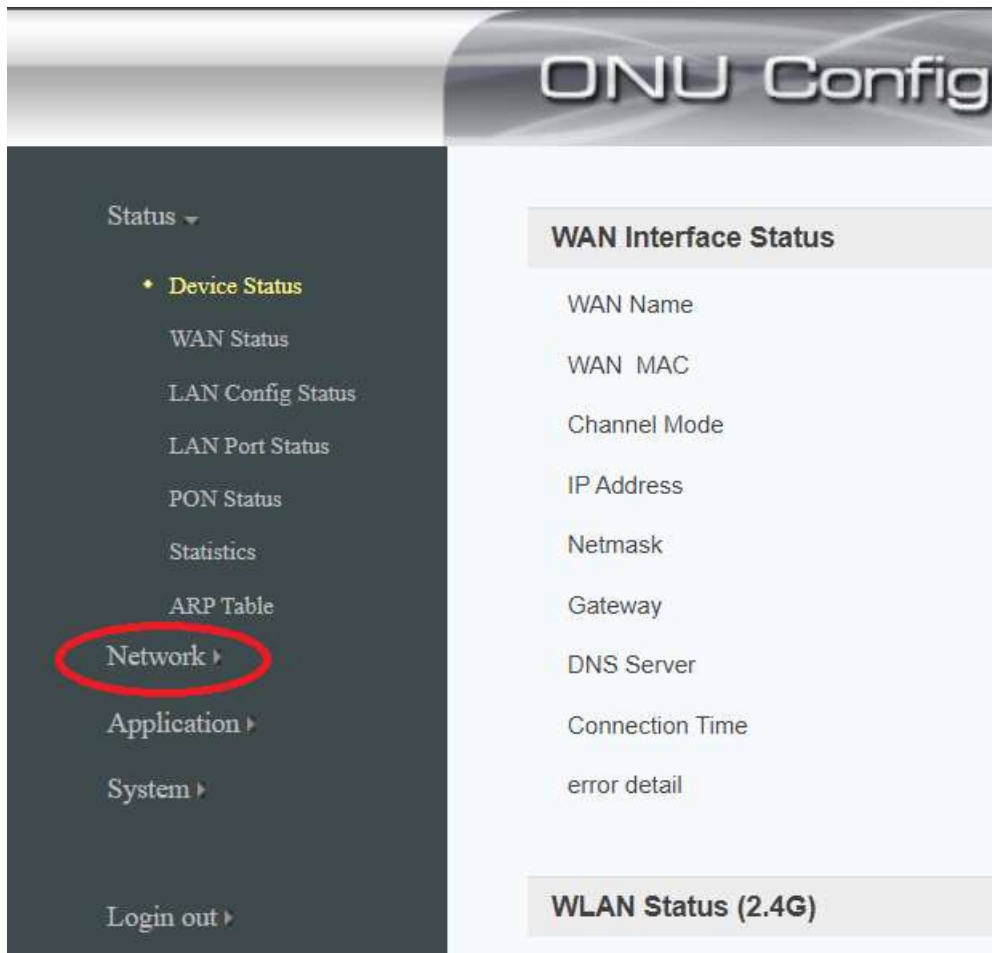

User ID:

Password:

Login

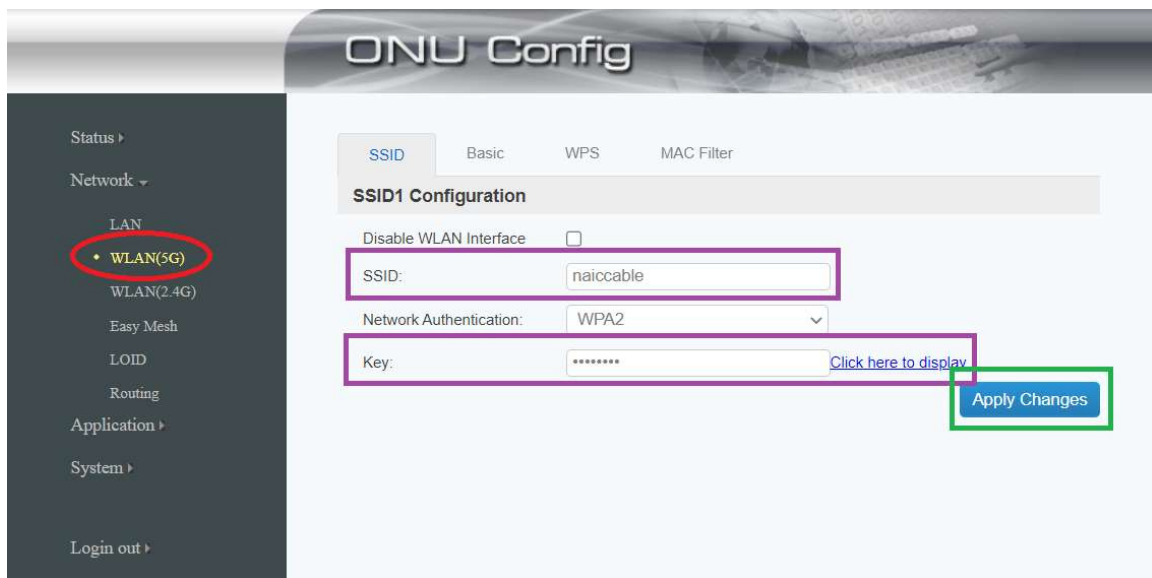

The image shows a login interface for the 'ONU WEB System'. It features a light blue background with a horizontal line separating the title from the login fields. The title 'ONU WEB System' is centered at the top. Below the line, there are two input fields: 'User ID' with the value 'admin' and 'Password' with masked characters '....'. To the right of these fields is a blue 'Login' button.

Step 3: On the left side of the screen click Network

Step 4:

Click on the WLAN(5G). You can change the name of your wifi network by changing the name in the SSID box. You can change the password of your wifi network by changing the name in the Key box. Click on the Apply Changes when you're done.

Step 5: Click on WLAN(2.4G) and repeat the process in step 4.
